## SUMMARY

Agile and stack-agnostic Software Developer driven by a product-first mindset. Proven ability to quickly adapt to new technologies and take ownership of projects. Focused on building solutions and optimizing the broader product vision.

## EDUCATION

**St. Vincent Pallotti College of Engineering & Technology, Nagpur** CGPA: 9.75  
*Bachelor of Technology in Computer Science and Business Systems, minor in AI* 2023 – 2027

## EXPERIENCE

**Quant Lead Intern** Mar 2026 – Present  
*WIN Capital Funds* Remote

- Developing and integrating quantitative strategy logic and performance evaluation pipelines
- Building and maintaining the walk-forward and out-of-sample validation framework.

**Co-Founder** Mar 2026 – Present  
*Daemons Build (daemonsbuild.me)* Nagpur, India

- Co-founded an elite technical agency acting as the dedicated engineering wing for early-stage startups.
- Automated Python backtesting infrastructure for algorithmic trading strategies.

**Intern (Algorithms and Backend)** Jan 2026 – Present  
*AimFi Capital* Hyderabad, India (Remote)

- Building, implementing and backtesting trading logic and algorithmic strategies.
- Fetching and processing stock market data to evaluate and optimize strategy performance.

## PROJECTS

**QuantLabs** | *React, Node.js, Python* 2026

- Engineered an enterprise-grade algorithmic trading sandbox featuring an NLP-to-Code bridge that translates natural language into executable Python backtesting scripts.
- Built a high-performance execution engine processing historical OHLCV data to calculate institutional risk metrics including Sharpe Ratio and Max Drawdown.
- Implemented an automated portfolio rebalancer enforcing strict risk management and proactive options hedging against market volatility (using market sentiments).

**Ekonos** | *Rust, Solana, Anchor* 2025 /link

- Developed a fractional asset ownership protocol on Solana as a Turbin3 Capstone project.
- Implemented secure vaults and token distribution logic to handle user investments seamlessly.

**Multi-threaded Web Server** | *Rust* 2025 /link

- Built a raw HTTP server from scratch to understand low-level TCP and memory management.
- Created a custom Thread Pool to process multiple incoming requests simultaneously.

**Quill.ai** | *JavaScript, Chrome Extension, AI* 2025 /link

- Developed a Chrome extension that reads web forms and auto-fills them with AI-generated content.
- Used DOM manipulation to detect input fields and inject responses in real-time.

## TECHNICAL SKILLS

**Languages:** Rust, Python, C++, SQL, JavaScript, TypeScript  
**Frameworks:** Anchor, React, Node.js, MERN  
**Developer Tools:** Git, VS Code, Surfpool, Postman  
**Libraries:** pandas, NumPy, Matplotlib

## CERTIFICATIONS

**Solana Builder Graduate** | *turbin3.org* 2025  
**School of Solana Graduate** | *ackee.xyz* 2025  
**Disaster Risk Monitoring Using Satellite Imagery** | *NVIDIA* 2024  
**Python and SQL for Data Science** | *Scaler* 2024

AWARDS AND ACHIEVEMENTS

|                                                             |      |
|-------------------------------------------------------------|------|
| Blockchain Nexus, IIT Kanpur   <i>First Position</i>        | 2025 |
| Stellar Ragnarok, Nagpur   <i>Second Position</i>           | 2025 |
| Raisoni Tech Hackathon, Nagpur   <i>First Position</i>      | 2024 |
| Outstanding Tech Performer, SVP CET   <i>Award Receiver</i> | 2024 |
| SIH Expo, SVP CET   <i>Third Position</i>                   | 2024 |
| Dataverse, SVP CET   <i>First Position</i>                  | 2024 |

CONTRIBUTIONS & COMMUNITY INVOLVEMENT

|                                                                                                                                                                                                                                                                                |      |
